SUMMARY

Solutions Architect and Engineering Manager with over 20 years of experience delivering enterprise web platforms, with deep expertise in Drupal. Specializes in large-scale hosting migrations to containerized platforms, CDN and WAF security and performance, and production troubleshooting across the full stack. Currently leads a team of 6–8 engineers at amazee.io, combining hands-on technical depth with client-facing work spanning pre-sales, solution design, and training. Bilingual in Spanish and English.

EXPERIENCE

amazee.io

Solutions Lead

January 2025 - Present, Remote

- Lead a team of 6–8 developers and engineers delivering AI solutions, enterprise migrations, and platform configuration: setting technical direction, assigning projects and reviewing code, mentoring team members, and serving as the main point of contact between the team and client stakeholders.
- Direct enterprise Drupal migrations from Acquia (including Site Factory), Upsun (formerly Platform.sh), Pantheon, and others to Lagoon, owning the full lifecycle from portfolio audit and application discovery through wave planning, cutover sequencing, and rollback readiness.
- Develop AI solutions for client platforms, including AI-powered search engines, agent orchestration, and workflow automation with n8n.
- Design platform architecture for multi-site estates on containerized hosting, including a shared base image approach that standardizes builds across a large site portfolio, plus PHP-FPM, Redis, Solr, and persistent storage sizing for production workloads.
- Manage edge security and performance on Fastly and Signal Sciences WAF for high-traffic publishing properties: custom VCL debugging, bot traffic analysis, and rate-limiting rule design using compound client identifiers and ASN-based grouping, including rule validation during active attacks.
- Act as senior technical escalation point for production issues across Drupal, Fastly, and Lagoon, diagnosing root causes such as caching misconfigurations, crawler traps, and image-processing failures, and delivering formal remediation and sizing recommendations to clients.
- Build client and internal enablement programs, including a Lagoon training syllabus, an onboarding curriculum, and an application discovery workshop checklist, and author pre-sales deliverables such as RFP responses and executive presentations.

Technical Account Manager

January 2024 - January 2025

- Served as primary technical contact for a portfolio of over 10 enterprise hosting clients, translating business needs into platform configuration and coordinating with support and engineering teams on their behalf.
- Diagnosed and resolved client issues across Drupal, Lagoon, and Fastly, covering deployments, performance, and caching, and guided client development teams through the fixes.
- Identified optimization opportunities in client environments, recommending caching, resource sizing, and configuration changes that reduced hosting costs and improved site speed.
- Designed and implemented a company-wide TAM reporting system, standardizing account health tracking and technical activity reporting across all accounts.

Director of Development

Taoti Creative

January 2018 - December 2023, Washington, DC | Remote

- Led a 30-person development department, directly managing the managers of its individual teams and holding overall accountability for engineering delivery.
- Raised billable utilization across the entire department by 10%.
- Defined the department's processes, workflows, and best practices, and established coding standards and code review practices that cut post-launch bug rates by 15%.
- Owned the full hiring lifecycle for developers, from interviews through final hiring decisions, building a high-performing team.
- Mentored technical leads and coached emerging managers, developing the department's next layer of leadership.
- Provided technical oversight for all new Drupal builds.
- Partnered with sales and client success teams on new client acquisition and project delivery, providing technical guidance through the sales process and keeping delivery aligned with client expectations.

Full Stack Engineer

Tag1 Consulting | Part-time

July 2021 - May 2022, St. Petersburg, FL | Remote

- Developed and maintained large-scale Drupal builds for FAANG clients.
- Produced estimates and delivery plans for new features and projects.
- Tested and troubleshooted new features on internal tools.
- Developed and implemented automated testing frameworks for complex Drupal modules, reducing manual testing efforts by 40%.

Technical Lead

O8 Digital Marketing | Part-time

February 2021 - July 2021, Minneapolis, MN | Remote

- Led technical delivery on new builds and maintenance projects.
- Served as the main point of contact for clients.
- Planned and assigned developer tasks and reviewed the completed work.

Technical Lead | Part-time

Tri-8

April 2016 - January 2018, Oklahoma City, OK | Remote

- Architected scalable, cloud-native web applications, defining application structure and technology choices.
- Developed application front ends in Vue.js and complementary technologies.
- Spearheaded the design and delivery of a web application for a major utility provider, enhancing user engagement.

Technical Lead

Adept Developer

April 2016 - December 2016, Houston, TX | Remote

- Consulted with clients to define project scope and technical requirements for new website builds.
- Built client websites using PHP, jQuery, and REST API integrations.
- Advised on the approach to client website projects, aligning each with technical capabilities and business objectives.

Development Manager

O'Connor & Tate

April 2013 - March 2016, New York, NY | Remote

- Directed engineering operations, leading a team of developers, optimizing workflows, and assigning technical responsibilities across projects.
- Defined and implemented standardized development workflows and quality assurance gates, increasing project delivery predictability by 20%.
- Acted as the primary technical authority in high-stakes sales meetings and client consultations, bridging the gap between business requirements and technical execution.
- Architected enterprise-grade web solutions, defining overarching technology stacks, infrastructure models, and delivery strategies.

EDUCATION

Bachelor's degree in Systems Engineering

Tecnológico de Costa Rica • Cartago, Costa Rica • 2008

SKILLS

- Drupal and WordPress
- Enterprise Hosting Migrations
- Docker, Lagoon and Kubernetes
- Acquia, Pantheon, Upsun (formerly Platform.sh), amaze.io
- Fastly and Cloudflare CDN, Custom VCL
- Signal Sciences WAF, Bot Mitigation
- Performance Tuning: PHP-FPM, Redis, Solr, ElastiCache, Valkey
- Bash Scripting, DevOps Automation
- AI Integration: AI Search, Chatbots, Agents
- Team Leadership and Mentoring
- Solutions Consulting and Pre-Sales
- Technical Account Management
- Bilingual: Spanish and English
